

A highly secret unit of the U.S. Military and the National Reconnaissance Office, NRO, has developed holographic projection.

Figure 1 Supposed "ISS" 250 miles away. This could easily be a holographic projection from automated ground stations with sodium layer lasers or other technology.

That is, in simple terms, images of supposed moving and flying devices are inserted in the skies and clouds, or upon the same. Most every eyewitness would swear under oath, that they saw a real "thing". An "enemy" army can be ordered to surrender by a Deity speaking to them from a cloud (by holographic magic) ordering them to lay down their arms.

One of the biggest secrets of the NRO is the "Crop Circle Syndrome".

Figure 2 Lasers test Marshall Islands

Ornate designs suddenly show up on farms in various parts of the world. Since the designs are so intricate, many UFO book-writers theorize that some off-the-planet forces are doing it. And, presumably, these forces are ETs. Yes, it is off-the-planet, okay, but not ETs. Rather, the NRO is in charge of the super-secret satellites and other forms of machinery, that have super-duper laser, particle beam, and other so far unlabeled technology. So greatly ahead of any published sources, these devices are more or less generally unknown. And, the mechanisms operate beyond the human-visible and sometimes even machine-visible spectrum. In plain terms, these machines tattoo the earth.

With the Soviets no longer the great bogeyman, the ruling families, to further cow and control ordinary Americans, and other common people worldwide, have a Plan B, already in progress. Hollywood, always tied to the Pentagon and the war-mongers, has long-since helped this Plan with stories about Unidentified Flying Objects, UFOs, real, or otherwise. A long-time secret project has been anti-gravity machines. A small belated admission has come out from Boeing. Interesting, that they refer to the Boeing division, as the Phantom Works. "Boeing challenges the laws of physics", Financial Times, 7/29/02

Not mentioned are the secret anti-gravity machine projects of the Fermi Labs, an adjunct of Rockefeller's University of Chicago.

Controlling satellites for military, media, and communications purposes, has been the NRO. Until several years ago, it was forbidden for the monopoly press to even confirm the existence of the NRO. A huge super-secret facility near the Capitol has been built for NRO costing more than 300 million dollars. This, without members of Congress on any budget committee knowing of the project or at least, denying that they know. [A story for another time is how key members of the House and the Senate are stooges for the secret political police.]

Examples of NRO secrets include their satellite imaging. Their satellites view practically every blade of grass near the CIA headquarters in Virginia. Near that location is the Civil War historic site, Ft. Marcy Park. That is where the body was found of Clinton White House Deputy Counsel Vincent. W. Foster, Jr. He supposedly was a "suicide". All along, the NRO has proof, by satellite imaging, of his murder and removal, how his body was moved by identifiable persons from in or near the White House parking lot to be dumped near some Civil War cannons in Ft. Marcy Park. To confuse matters, the location is right across the road from the mansion of the Saudi Ambassador to the U.S., raising questions about him and his aids. Did they see or hear anything? As a cover up, a key NRO official, as to satellite imaging, Daniel Potter, was murdered in recent years.

One of the biggest secrets of the NRO is the "Crop Circle Syndrome". Ornate designs suddenly show up on farms in various parts of the world. The purpose? Plan B. Since the Moscow government is no longer our "enemy" (if they ever really were), then earthlings have to be controlled, to deal with "enemies" from some faraway galaxy. "Enemies" or

50 Watt Sodium Laser

"Friends" supposedly sending us some kind of messages elegantly embroidered in the earth. With a financial collapse expected, these methods of controlling the populace are even more strategic and urgent.

Marshall Islands laser test

I fully expect "crop circle" magazine and book publishers to start screaming against us for raising this issue, which operates to the detriment of their publishing profits and "prophets". By the way, about nine years ago our weekly one-hour public access Cable TV Show, "Broadsides", dared discuss an early version of the Plan B scenario. As we then stated, the plan was created to deal with expected financial collapse, by controlling the population, the easiest way, with vast superstitions and such, in the absence of the Moscow "enemies". One well-informed scientist, who would not allow us to use his name, did confirm our basic contentions. If ever we re-name our website, perhaps we should call it "Ahead of the Parade", which we have been for more than forty years, with the jeopardy and rewards of plusses and minuses. —Sherman Skolnick "greatest secrets".

CROP CIRCLES MADE FROM MILITARY SATELLITES LASERS

Judaeo-masonic occultists in

Crop Circles Made by Military Satellites

I have been visiting some crop circles in the UK, and I took some samples of vegetation and dead insects with me.

At home, with my microscope I have been carefully observing the tissues of the plants and of the insects. In order to find out how their state could be reproduced, I put some healthy plants and insects in a modified microwave oven combined with a laser burner (yes, I am truly sorry for this rude experiment) and I examined the tissues under the microscope.

Comparing the tissues, that I took from the crop circles in the UK with that I took from my microwave oven, brought me to an interesting conclusion : they look highly similar.

In other words, the crop circles have been produced by microwave laser technology. This technology is used by the military.

Microwave laser games

As you know, with lasers it is possible to cut (fashion, dentist, etc.), bend and melt (industrial), and so forth, at great precision and from large distance. Microwave laser technology, or better, maser

etc.), bend and melt (industrial), and so forth, at great precision and from large distance. Microwave laser technology, or better, maser technology, is used at a military satellite in order to "shoot" maser beams at precisely computed locations on our planet.

This kind of satellite is aimed to destroy anything at any time at any location under any atmospheric circumstances. Such satellite is not publicly known, i.e. kept secret, of course, and is responsible for several "unresolved" airplane crashes.

Yes my dear visitor, maser satellites are flying right over you and you are not safe. It is all in the game of cover-up, misusing the belief of mankind that extra-terrestrials are having an artistic party overnight. Well, not so, as the militaries are playing around with masers, using computers to design nice patterns and to guide the maser beams.

In the early 1970's I started playing with mainframe computers to produce nice mathematical patterns. And sure I was not the only one. It is a common hobbyism. Nothing to do with galactic federations and Alien prophecies or symbols of universal wisdom.

Now, back to my microscopic investigation : in both cases (from the UK by artistic militaries and from my microwave & laser burner) the tissues of the plants showed tiny particles of near-crystallized dust that were melted / bonded with the tissue. Both the plants and the insects were literally cooked. This effect can only be reached by masers.

Aiming a computer guided maser at high altitude towards a crop field, in about 15 seconds a large complex pattern can be projected and "cooked in", using rotating maserbeams (it would be quite unfortunate if you would be moving under the beam at such moment)

Weapon used as toy

This is how crop circles are made, with a computer guided maser satellite, by bored artistic militaries. Period.

This is how crop circles are made, with a computer guided maser satellite, by bored artistic militaries. Period.

Oh, and the light flashes ? Well, simple, because of the electromagnetic field that is caused by the maser, the energy release is perceived as a flash of light. Sure they leave traces of energy in the plants, commonly incorrectly interpreted as spiritual energies of some sort. I have been into this research myself when I was studying all that stuff for my graduation.

By the way, if indeed Aliens have been around for thousands of years, how come that only since a few years cropcircles have been reported ? Since a few years, however, we do have star wars satellites - made by us - orbiting planet Earth. Once again, crop circles are NOT made by Aliens or UFOs, but simply by a maser satellite, programmed by a bunch of geeks. Keep it simple.

Yes, Space Based Laser Platforms Are Real

August 23, 2015

Way back in April of 2013 we took a look at the emerging technology of laser weapons in space, primarily to take out “enemy” satellites, and possibly to strike targets on the surface of the planet. Following up, in April 2014 we ran an article about the U.S Navy’s new laser weapon, which appears to be very powerful and inexpensive to operate compared to artillery shells. In this post we will update the revelations of laser warfare, something that has probably existed for quite some time and is just getting more sophisticated. First, here’s the links to those two articles:

Are Space Based Laser Platforms A Reality?

<http://www.covertbookreport.com/are-space-based-laser-platforms-a-reality/>

Navy Shows Off New Laser Weapon <http://www.covertbookreport.com/navy-shows-off-new-laser-weapon/>

Here’s the first article for some background:

Every time some underdeveloped nation (like North Korea this week) rattles the nuclear saber, I have to wonder about the long-rumored existence of “Space-based laser platforms”.

Dating back to German scientists (Britans were worried about a “death ray”) who were brought into the U.S. after WW2, through the Regan-era “Star Wars” missile-defense system, laser technology has been proposed to blast missiles out of orbit after launch.

Just such a system would be quite useful against rogue states, but because of the potential for offensive use against earth targets would have to be kept under tight wraps.

One could imagine that a treaty could exist between a coalition of powerful nations to only use this technology for agreed purposes.

What lends some credibility to this scenario is the saga of British stoner-computer hacker Gary McKinnon. Until recently, McKinnon was facing extradition and prison charges in the U.S. for hacking into extremely sensitive defense and NASA computers.

What did he find?

Evidence of the U.S. Space Command. That’s right, a branch of the U.S. Navy that has a fleet of orbital space stations.

From “The Honolulu Examiner”, October 2012:

UFO hacker wins battle against US Government

“On Tuesday November 16, British hacker Gary McKinnon finally won his decade long battle to avoid extradition to the US to face charges of hacking into the computer systems of NASA, the Pentagon and other government agencies. McKinnon claimed to have found photographs, film, and other evidence of alien spacecraft secretly held by various U.S.

his decade long battle to avoid extradition to the US to face charges of hacking into the computer systems of NASA, the Pentagon and other government agencies. McKinnon claimed to have found photographs, film, and other evidence of alien spacecraft secretly held by various U.S. government agencies.

(snip)

McKinnon first hacked into NASA's Johnson Space Center and said: "he found a high definition picture of a large cigar shaped object over the northern hemisphere. He said that he was so shocked by the picture that he didn't think to immediately save it. He also said that the file size was so large that it was difficult to view it on his computer. Eventually his connection was lost, and so was the picture.

When McKinnon later hacked into classified files of U.S. Space Command (incorporated into Strategic Command on October 1, 2002 soon after McKinnon was caught), he discovered a number of naval terms such as "fleet-to-fleet transfers" concerning non-terrestrial officers. He said: "I found a list of officers' names ... under the heading 'Non-Terrestrial Officers'. It doesn't mean little green men. What I think it means is not Earth-based. I found a list of 'fleet-to-fleet transfers', and a list of ship names. I looked them up. They weren't US Navy ships. What I saw made me believe they have some kind of spaceship, off-planet."

McKinnon's startling discovery cast light on what had been earlier revealed by no less than a former President of the United States: Ronald Reagan. **In President Reagan's Diary, the entry for Tuesday, June 11, 1985 (page 334) reads:**

"Lunch with 5 top space scientist. It was fascinating. Space truly is the last frontier and some of the developments there in astronomy etc. are like science fiction, except they are real. I learned that our shuttle capacity is such that we could orbit 300 people.

Reagan's comment was revealing since the recently retired Space Shuttle held a maximum of eight people and only five were built for space flight. Even if all five took off fully loaded it would be impossible to place and maintain 300 astronauts in orbit. Was Reagan revealing the existence of a highly classified space program that could accommodate hundreds of astronauts in orbit? Apparently so, according to dozens of military and corporate whistleblowers. Hidden within one of the nine unified combatant commands of the U.S. military, as McKinnon later discovered, appeared to be a highly classified fleet of aircraft carrier sized ships that operate in outer space.

Now that McKinnon no longer faces the threat of extradition and is unlikely to be prosecuted by British authorities, he may be able to reveal more about what he learned from sensitive U.S. military and government computer files about UFOs and extraterrestrial life."

Every year, thousands of people all over the world witness huge flying "triangles" and other sorts of craft. While some of these may be chalked up to "swamp gas", there are far too many reports from aviation and radar experts to deny the existence of something top secret.

For some background on space-based laser platforms, take a look at this website for The Federation of American Scientists:

Space Based Laser [SBL]The potential to intercept and destroy a missile over enemy territory soon after launch, rather than over friendly territory, makes the development of a boost phase intercept (BPI) capability very desirable. In concert with ground based theater missile defense (TMD) systems already under development, the U.S. continues to investigate BPI concepts for BMD systems.

The SBL program could develop the technology to provide the U.S. with an advanced BMD system for both theater and national missile defense. BMDO believes that an SBL system has the potential to make other contributions to U.S. security and world security as a whole, such as inducing potential aggressors to abandon ballistic missile programs by

BMDO believes that an SBL system has the potential to make other contributions to U.S. security and world security as a whole, such as inducing potential aggressors to abandon ballistic missile programs by rendering them useless. Failing that, BMDO believes that the creation of such a universal defense system would provide the impetus for other nations to expand their security agreements with the United States, bringing them under a U. S. sponsored missile defense umbrella. An SBL platform would achieve missile interception by focusing and maintaining a high powered laser on a target until it achieves catastrophic destruction. Energy for the sustained laser burst is generated by the chemical reaction of the hydrogen fluoride (HF) molecule. The HF molecules are created in an excited state from which the subsequent optical energy is drawn by an optical resonator surrounding the gain generator.

Lasers have been studied for their usefulness in air defense since 1973, when the Mid Infrared Advanced Chemical Laser (MIRACL) was first tested against tactical missiles and drone aircraft. Work on such systems continued through the 1980s, with the Airborne Laser Laboratory, which completed the first test laser intercepts above the earth. Initial work on laser based defense systems was overseen by the Defense Advanced Research Projects Agency (DARPA), but transferred to the newly created Strategic Defense Initiative Organization (SDIO) in 1984. Work continues today under the auspices of the BMDO, the successor to the SDIO.

(snip)

Current SBL planning is based on a 20 satellite constellation, operating at a 40° inclination, intended to provide the optimum TMD threat negation capability. At this degree of deployment, kill times per missile will range from 1 to 10 seconds, depending on the range from the missile.

Retargeting times are calculated at as low as 0.5 seconds for new targets requiring small angle changes. It is estimated that a constellation consisting of only 12 satellites can negate 94% of all missile threats in most theater threat scenarios. Thus a system consisting of 20 satellites is expected by BMDO to provide nearly full threat negation.”

If you go to the above link, there are lots of other reference links to research.

I have a feeling that this technology is far more advanced than they are letting on to...

War in Space May Be Closer Than Ever

China, Russia and the U.S. are developing and testing controversial new capabilities to wage war in space despite their denial of such work

By Lee Billings | August 10, 2015 (excerpts)

“The emptiness of outer space might be the last place you’d expect militaries to vie over contested territory, except that outer space isn’t so empty anymore. About 1,300 active satellites wreath the globe in a crowded nest of orbits, providing worldwide communications, GPS navigation, weather forecasting and planetary surveillance. For militaries that rely on some of those satellites for modern warfare, space has become the ultimate high ground, with the U.S. as the undisputed king of the hill. Now, as China and Russia aggressively seek to challenge U.S. superiority in space with ambitious military space programs of their own, the power struggle risks sparking a conflict that could cripple the entire planet’s space-based infrastructure. And though it might begin in space, such a conflict could easily ignite full-blown war on Earth.

struggle risks sparking a conflict that could cripple the entire planet's space-based infrastructure. And though it might begin in space, such a conflict could easily ignite full-blown war on Earth.

The long-simmering tensions are now approaching a boiling point due to several events, including recent and ongoing tests of possible anti-satellite weapons by China and Russia, as well as last month's failure of tension-easing talks at the United Nations.

Testifying before Congress earlier this year, Director of National Intelligence James Clapper echoed the concerns held by many senior government officials about the growing threat to U.S. satellites, saying that China and Russia are both "developing capabilities to deny access in a conflict," such as those that might erupt over China's military activities in the South China Sea or Russia's in Ukraine. China in particular, Clapper said, has demonstrated "the need to interfere with, damage and destroy" U.S. satellites, referring to a series of Chinese anti-satellite missile tests that began in 2007.

There are many ways to disable or destroy satellites beyond provocatively blowing them up with missiles. A spacecraft could simply approach a satellite and spray paint over its optics, or manually snap off its communications antennas, or destabilize its orbit. Lasers can be used to temporarily disable or permanently damage a satellite's components, particularly its delicate sensors, and radio or microwaves can jam or hijack transmissions to or from ground controllers."

"...space-based surveillance became a crucial component of the Cold War, with satellites serving as one part of elaborate early-warning systems on alert for the deployment or launch of ground-based nuclear weapons. Throughout most of the Cold War, the U.S.S.R. developed and tested "space mines," self-detonating spacecraft that could seek and destroy U.S. spy satellites by peppering them with shrapnel. In the 1980s, the militarization of space peaked with the Reagan administration's multibillion-dollar Strategic Defense Initiative, dubbed Star Wars, to develop orbital countermeasures against Soviet intercontinental ballistic missiles. And in 1985, the U.S. Air Force staged a clear demonstration of its formidable capabilities, when an F-15 fighter jet launched a missile that took out a failing U.S. satellite in low-Earth orbit."

"“This used to be a black program—something that didn't even officially exist,” Weeden says. “It was declassified to basically send a message saying, ‘Hey, if you’re doing something funky in and around the geosynchronous belt, we’re going to see.’” An interloper into geosynchronous orbit need not be an explosives-tipped missile to be a security risk—even sidling up to an adversary's strategic satellites is considered a threat. Which is one reason that potential U.S. adversaries might be alarmed by the rendezvous capabilities of GSSAP and of the U.S. Air Force's highly maneuverable X-37B robotic space planes.”

Now, from the Russian side:

<http://sputniknews.com/military/20150814/1025760955/russia-us-star-wars.html>

The Russian Defense Ministry has developed new technology to counter US battle stations in space, said Igor Nasenkov, the first deputy head of Russia's Radio-Electronic Technologies Concern (RETC), according to Russian media sources.

"If the United States starts developing and launching its battle stations into space, Russia will have to respond in kind — namely with the development of high-performance Electronic Warfare (EW) tools on different types of bases; the use of these tools will be a distinct advantage [for Russia]," Nasenkov said, as quoted by Rossiyskaya Gazeta.

Defense industry enterprises already have the necessary scientific and technological foundation, including layout models for future EW tools, the high-ranking RETC official said.

Defense industry enterprises already have the necessary scientific and technological foundation, including layout models for future EW tools, the high-ranking RETC official said.

All Russia needs right now is a political decision and appropriate funding to kick start the project, Nasenkov said.

Last week, US media reported about Washington's plans to militarize space, as in future conflicts between major superpowers Earth's orbit will become a new battlefield.

Laser-armed satellites, long-range anti-aircraft missiles and other deadly weapons of destruction would attack and destroy enemy orbital forces.

Now, for all you techno-geeks out there, here's 54 pages of descriptions, charts and depictions of space laser technology in a joint U.S. Air Force – Boeing patent:

You know damned well that if this is unclassified and available on the internet, it's outdated technology and something way more sophisticated is in use today, perhaps even with the capabilities to take out targets on earth.

NASA's Project Blue Beam: Fake Alien Invasion

By Serge Monast (1994)

The infamous NASA [National Aeronautics and Space Administration] Blue Beam Project has four different steps in order to implement the new age religion with the Antichrist at its head. We must remember that the new age religion is the very foundation for the new world government, without which religion the dictatorship of the new world order is completely impossible. I'll repeat that: Without a universal belief in the new age religion, the success of the new world order will be impossible! That is why the Blue Beam Project is so important to them, but has been so well hidden until now.

Engineered Earthquakes & Hoaxed 'Discoveries' The first step in the NASA Blue Beam Project concerns the breakdown [re-evaluation] of all archaeological knowledge. It deals with the set-up, with artificially created earthquakes at certain precise locations on the planet, of supposedly new discoveries which will finally explain to all people the "error" of all fundamental religious doctrines. The falsification of this

information will be used to make all nations believe that their religious doctrines have been misunderstood for centuries and misinterpreted. Psychological preparations for that first step have already been implemented with the film, '2001: A Space Odyssey,' the StarTrek series, and 'Independence Day,' all of which deal with invasions from space and the coming together of all nations to repel the invaders. The last films, 'Jurassic Park,' deals with the theories of evolution, and claim God's words are lies.

Hoaxed "Discoveries"

What is important to understand in the first step is that those earthquakes will hit at different parts of the world where scientific and archaeological teachings have indicated that arcane mysteries have been buried. By those types of earthquakes, it will be possible for scientists to rediscover those arcane mysteries which will be used to discredit all fundamental religious doctrines. This is the first preparation for the plan for humanity because what they want to do is destroy the beliefs of all Christians and Muslims on the planet. To do that, they need some false 'proof' from the far past that will prove to all nations that their religions have all been misinterpreted and misunderstood.

The Big Space Show in the Sky The second step in the NASA Blue Beam Project involves a gigantic 'space show' with three- dimensional optical holograms and sounds, laser projection of multiple holographic images to different parts of the world, each receiving a different image according to predominating regional national religious faith. This new 'god's' voice will be speaking in all languages. In order to understand that, we must study various secret services' research done in the last 25 years. The Soviet's have perfected an advanced computer, even exported them, and fed them with the minute physio-psychological particulars based on their studies of the anatomy and electromechanical composition of the human body, and the studies of the electrical, chemical and biological properties of the human brain.

These computers were fed, as well, with the languages of all human cultures and their meanings. The dialects of all cultures have been fed into the computers from satellite transmissions. The Soviets began to feed the computers with objective programs like the ones of the new messiah. It also seems that the Soviets – the new world order people – have resorted to suicidal methods with the human society by allocating electronic wavelengths for every person and every society and culture to induce suicidal thoughts if the person doesn't comply with the dictates of the new world order.

There are two different aspects of step two.

The first is the 'space show.' Where does the space show come from? The space show, the holographic images will be used in a simulation of the ending during which all nations will be shown scenes that will be the fulfillment of that which they desire to verify the prophecies and adversary events.

These will be projected from satellites onto the sodium layer about 60 miles above the earth. We see tests every once in a while, but they are called UFOs and "flying saucers" sightings.

The result of these deliberately staged events will be to show the world the new 'christ,' the new messiah, Matraia (Maitreya), for the immediate implementation of the new world religion. Enough truth will be foisted upon an unsuspecting world to hook them into the lie. "Even the most learned will be deceived."

The project has perfected the ability for some device [referred to as "tractor beams" by ufologists].to lift up an enormous number of people, as in a Rapture, and whisk the entire group into a never-never land We see tests of this device in the abduction of humans by those mysterious little alien greys who snatch people out of their beds and through windows into waiting "mother ships." The calculated resistance to

the universal religion and the new messiah and the ensuing holy wars will result in the loss of human life on a scale never imagined before in all of human history.

The Blue Beam Project will pretend to be the universal fulfillment of the prophecies of old, as major an event as that which occurred 2,000 years ago. In principle, it will make use of the skies as a movie screen (on the sodium layer at about 60 miles) as space-based laser- generating satellites project simultaneous images to the four corners of the planet in every language and dialect according to the region. It deals with the religious aspect of the new world order and is deception and seduction on a massive scale.

Computers will coordinate the satellites and software already in place will run the sky show. Holographic images are based on nearly identical signals combining to produce an image or hologram with deep perspective which is equally applicable to acoustic ELF, VLF and LF waves and optical phenomena. Specifically, the show will consist of multiple holographic images to different parts of the world, each receiving a different image according to the specific national, regional religion. Not a single area will be excluded. With computer animation and sounds appearing to emanate from the very depths of space, astonished ardent followers of the various creeds will witness their own returned messiahs in convincing lifelike reality.

Then the projections of Jesus, Mohammed, Buddha, Krishna, etc., will merge into one after correct explanations of the mysteries and revelations will have been disclosed. This one god will, in fact, be the Antichrist, who will explain that the various scriptures have been misunderstood and misinterpreted, and that the religions of old are responsible for turning brother against brother, and nation against nation, therefore old religions must be abolished to make way for the new age new world religion, representing the one god Antichrist they see before them.

Naturally, this superbly staged falsification will result in dissolved social and religious disorder on a grand scale, each nation blaming the other for the deception, setting loose millions of programmed religious fanatics through demonic possession on a scale never witnessed before. In addition, this event will occur at a time of profound worldwide political anarchy and general tumult created by some worldwide catastrophe. The United Nation even now plans to use Beethoven's 'Song of Joy' as the anthem for the introduction for the new age one world religion.

If we put this space show in parallel with the star wars program we get this: combination of electromagnetic radiation and hypnosis which have also been the subject of intensive research. In 1974, for instance, researcher G. F. Shapits, said of one of the research proposals that, '...in this investigation it will be shown that the spoken words of the hypnotist may also be converted by electromagnetic energy directly and to the subconscious part of the human brain without employing any mechanical device for receiving or transcoding the message, and without the person exposed to such influence having a

chance to control the information input consciously. It may be expected that the rationalized behavior will be considered to have been taken out of their own free will.'

Anyone investigating so-called 'channelling' phenomena right now would be wise to take this area of research into consideration. It will be noted that those who think of themselves as 'channellers' has escalated rapidly since this type of research was conducted. It is uncanny how similar their messages are, despite which entity they claim to be their source of divine guidance. It would suggest any individual considering the credibility of channelled information should be discerning and critically evaluate where the message they are receiving originates, and if the messages are specifically beneficial to the new world order.

The Sydney Morning newspaper published an item on March 21st, 1983 which announced that the Soviets were invading the human mind, the article having been submitted to the foreign editor by Doctor Nathan Abnuengy, assistant professor in the faculty of agriculture in Asia. It is worth quoting the article at length even though his grammar is a little old. This article relates to the Soviets who created the supercomputer we were discussing earlier and which is really important because these types of computers can be run through satellites and through space.

The computers were fed with all the different languages and their meanings, the dialect of all peoples were fed to the computers with objective programs. But we are no longer talking about the Soviets; we are talking about the United Nations, the minions of the new world order, who are feeding the computers with the necessary information.

The editor of the column in which the article appeared even states that the piece made points too important to ignore. I think it is possible that the persons who have created this mega-mind- control-program could sell the software to an organization and not be aware that the client might use the program and data to enslave all of humankind. Just imagine how far they have advanced since that article was published!

Artificial Thought & Communication The advancement of techniques propel us toward the third step in the Blue Beam Project that goes along with the telepathic and electronically augmented two-way communication where ELF, VLF and LF waves will reach each person from within his or her own mind, convincing each of them that their own god is speaking to them from the very depths of their own soul. Such rays from satellites are fed from the memories of computers that have stored massive data about every human on earth, and their languages. The rays will then interlace with their natural thinking to form what we call diffuse artificial thought.

That kind of technology goes into the 1970s, 1980s, and 1990s research where the human brain has been compared to a computer. Information is fed in, processed, integrated and then a response is formulated and acted upon. Mind controllers manipulate information the same way a computer for grammar manipulates information. In January 1991, the University of Arizona hosted a conference entitled, 'The NATO Advanced Research Workshop on Current and Emergent Phenomena and Biomolecular Systems.' What does that mean exactly? It means this: We refer to one paper that was delivered at the conference which stands out for its different attitude towards the development under discussion at that time. It was, in effect, a protest and chilling warning to the attending scientists about the potential abuse of their research findings.

Their findings, of course, stated that the United States has already developed communications equipment which can make the blind see, the deaf hear and the lame walk. It can relieve the terminally ill from pain without the use of drugs or surgery. I'm not talking about science fiction. A man might retain the use of all his faculties right up to the moment of his death. This communications equipment depends upon a completely new way of looking at the human brain and neuromuscular systems and radiation pulses at ultra-low frequencies. Some of this equipment is now operational within the Central Intelligence Agency (CIA), and Federal Bureau of Investigation (FBI). It will never be used to make the blind see, the deaf hear and the lame walk because it is central to the domestic political agenda and foreign policy of George Bush and his puppet-masters of the new world order.

Domestically, the new communications equipment is being used to torture and murder persons who match profiles imagined to be able to screen a given population for terrorists; to torture and murder citizens who belong to organizations which promote tolerance and peace and development in Central America; to torture and murder citizens who belong to organizations who oppose the development and deployment of nuclear weapons, and to create a race of slave cult automatons, or what is popularly called 'the Manchurian Candidates.' Overseas experimentation is taking place on hostages held by the United States and Canada, Great Britain, Australia, Germany, Finland and France. Additionally, there has been a long series of bizarre suicides among British computer scientists, all of whom have had some connection to the United States Navy.

What is possible to ask before such a psychology of terror is this: would any government, corporation or psychiatrist wilfully promote such horror today? The answer is quite obviously, 'Yes.'

Government agencies and the corporations that work with them toward a new world order are prepared to promote anything that will help them achieve their objective of total social control. As for the question of why: For one thing, if you terrify the public and make them fear for their safety, they will allow you to implement draconian law enforcement practice, disarm them and keep extensive records on them, and they only have to tell you that it is all to protect you, of course. Secondly, it promotes the decay of the present democratic forms of political systems, and leads societies to search for alternative methods of political ideology.

Of course, the alternative has already been planned.

It is called the New World Order and it will not have your safety or interests at heart. As George Bush said: 'Read my lips.' Fear has always been used by powerful elite to control and subjugate the masses.

The old maxim, 'divide and conquer', is being played out to the limit worldwide to ensure that everyone is frightened for their personal safety, and to be suspicious of everyone else. This, too, is mind-control. To go further in regard to the new technology which is at the base of the NASA Blue Beam Project, we have to consider this statement by psychologist James V. McConnell which was published in a 1970s issue of Psychology Today.

He said, 'The day has come when we can combine sensory deprivation with drug hypnosis and astute manipulation of reward and punishment to gain almost absolute control over an individual's behavior. It should then be possible to achieve a very rapid and highly effective type of positive brainwashing that would allow us to make dramatic changes in a person's behavior and personality.'

Now, when we talked before about that kind of ray and the telepathic and electronically augmented communication, the kind of rays that are fed from the memories of computers which store massive data about humans, human language and dialects, and we said that the people will be reached from within, making each person to believe that his own god is speaking directly from within his or her own soul, we refer to that kind of technology and that kind of thinking that same psychologist was espousing, that is: we should be trained from birth that we should all do what society wants us to do rather than what we want to do for ourselves; that because they have the technology to do it, no one should now be allowed to have their own individual personality. \

This statement and these ideas are important because it is the basic teaching of the United Nations that no one owns his or her own personality. And that same psychologist claims that no one has any say-so about the kind of personality they acquire and there is no reason to believe you have the right to refuse to acquire a new personality if your old personality is considered 'antisocial.'

What is important in this declaration is that the new world order will be set up over the current system, meaning the old way of thinking and behavior and religion will be considered the 'old' and incorrect way of thinking and that they can change it at one of the eradication camps of the United Nations to make sure that anyone with this 'antisocial' behavior will be disposed of quickly so that other modified individuals will be able to fulfill the needs and agendas of the new world order without being distracted by the truth.

Could this be the greatest mind control project ever?

The NASA Blue Beam Project is the prime directive for the new world order's absolute control over the populations of the entire earth. I would suggest you investigate this information carefully before dismissing it as fanatic lunacy. If we go further in the different reports we have presented, we find that the mind-control operations and technology include a transmitter that broadcasts at the same frequency as the human nervous-system, which transmitter is manufactured by the Loral Electro-Optical System in Pasadena, California. Loral, a major defense contractor, has previously conducted research on directed energy weapons for Lt. Gen. Leonard Perez of the U. S. Air Force who was searching for a weapon that could implant messages into the minds of the enemy while urging his own troops on to superhuman deeds of valor! The device employs electromagnetic radiation of gigahertz frequencies [microwaves] pulsed at extremely low frequencies (ELF).

It is used to torture people both physically and mentally from a distance.

Weapons of this type are thought to have been used against a British woman protesting the presence of American Cruise Missiles at Greenham Common Airbase during the 1970s. This weapon can be used to induce total sensory deprivation by broadcasting signals into the auditory nerve at such high power that it blocks the ability of the individual to hear themselves think!

The process employed by such ELF technology are described in various U. S. Defense Department publications, including one entitled, 'The Electromagnetic Spectrum and Low Intensity Conflict,' by Captain Paul E. Tyler, Medical Commandant, U. S. Navy, which is included in a collection entitled, 'Low Intensity Conflict and Modern Technology Edict,' by Lt. Col David G. Dean, USAF. The paper was delivered in 1984 and the collection published 1986 by Air University Press, Maxwell Airforce Base, Alabama. Another pulse microwave device can deliver audible signals directly to an individual while remaining undetectable to anyone else. The technology is very simple and can be built by using an ordinary police radar gun. The microwave beam generated by the device is modulated at audio frequencies and can broadcast messages directly into the brain. Now here we come to the NASA Blue Beam Project. The broadcasting of subliminal two-way communication and images from the depths of space correspond directly to that kind of technology.

In his book, 'The Body Electric,' Nobel Prize nominee Dr. Robert O. Becker describes a series of experiments conducted in the early 1960s by Allen Frie where this phenomena was demonstrated as well as later experiments conducted in 1973 at the Walter Reed Army Institute of Research by Dr. Joseph C. Sharp who personally underwent tests in which he proved he could hear and understand messages delivered to him in an echo-free isolation chamber via a pulsed microwave audiogram which is

an analog of the word's sound vibration beamed into his brain. Becker then goes on to state, 'Such a device has obvious application for covert operations designed to drive a target crazy with unknown voices or deliver undetectable instructions to a programmed assassin.'

Now figure out when we hear that voice from the new world messiah who would be speaking from space to all of the sane (?) people of the earth who might give instructions to zealots and religious fanatics, we would see hysteria and social mayhem on a scale never witnessed before on this planet. No police forces in the world, even as a combined front, could deal with the disorder that will follow! A 1978 book entitled, 'Microwave Auditory Effect and Application,' by James C. Lynn describes how audible voices can be broadcast directly into the brain.

This technology could actually allow the blind to see and the deaf to hear. Instead, it has been turned into a weapon to enslave the world.

Allen Frie also reports that he could speed up, slow down or stop the hearts of isolated frogs by synchronizing the pulsed rate of a microwave beam with the heart itself. According to Dr. Robert Becker, similar results have been obtained using live frogs, which shows that it is technically feasible to produce heart attacks with rays designed to penetrate the human chest.

[EDITOR'S NOTE: Both the author of this report and his colleague died of 'heart attacks' only days apart. I should mention also that Dr. Becker does NOT participate in such research.]

It has been demonstrated that focused ultra high frequency UHF electromagnetic energy beams can be used to induce considerable agitation and muscular activity or induce muscular weakness and lethargy. Microwaves can also be used to burn human skin and aid the effect of drugs, bacteria and poisons or affect the function of the entire brain. These effects were all revealed at length by the CIA on September 21, 1977 in testimony before the Subcommittee on Health and Scientific Research. Dr. Sidney Gottlieb who directed the MK-Ultra program at that time was forced to discuss the scope of the CIA's research to find techniques of activation of the human organism by remote electronic means. So this is something that exists right now, that has been pursued to its highest degree, that can be used from space to reach any person, anyplace on the face of the earth.

If we go deeper in that process of mind control over the people we find that the equipment and technology has been used to influence politics in a much more direct fashion. Michael Dukakis, the Democrat candidate running against George Bush in the 1988 election was targeted with microwave technology in order to impede his public speaking performance once the public opinion polls showed he posed a serious threat to Bush's election prospects. He also claims that the equipment was used against Kitty Dukakis and drove her to the brink of suicide. In the Disneyland world of U. S. politics, a

presidential candidate with problems such as these, would obviously lose their race to the White House. In the December 1980 edition of the U. S. Army Journal, called the Military Review, a column by Lt. Col John B. Alexander, entitled, 'The New Mental Battlefield: Beam Me Up, Spock,' provides further insight into the technical capabilities at the disposal of the comptroller.

He writes: "Several examples will demonstrate areas in which progress have been made. The transference of energy from one organism to another; the ability to heal or cause disease to be transmitted over a distance, thus inducing illness or death from no apparent cause; telepathic behavior modification which includes the ability to induce hypnotic states up to a distance of 1,000 kilometers have been reported.

The use of telepathic hypnosis also holds great potential. This capability could allow agents to be deeply planted with no conscious knowledge of their programming. In movie terms, the Manchurian Candidate lives, and does not even require a telephone call. 'Other mind-to-mind induction techniques are being considered. If perfected this capability could allow the direct transference of thought via telepathy from one mind or group of minds to a select target audience. The unique factor is that the recipient will not be aware that thought has been implanted from an external source. He or she will believe the thoughts are original."

This is exactly what we were talking about. The third step in the NASA Blue Beam Project is called the Telepathic Electronic Two-Way

Communication. Lt. Col John Alexander's article continues:

"If it is possible to feed artificial thought into the multigenic field via satellite, the mind control of the entire planet is now possible. An individual's only resistance would be to constantly question the motivation behind their thoughts and not act upon thoughts which they consider to be outside their own ideological, religious and moral boundaries."

Once again, it is wise to consider how television, advertising, modern education and various types of social pressure are used to manipulate those boundaries. It has been reported by Lt. Col Alexander who said, in the summary of his Military Review article,

'The information on those kinds of technologies presented here would be considered by some to be ridiculous since it does not conform to their view of reality. But some people still believe the world is flat.'

Now, this means a lot, because if people do not believe this kind of technology is possible, or that it is science fiction, those people put themselves in great jeopardy, because on the night when those thousand stars will shine from space, during the night when the new messiah will be presented to the world, they will not be prepared and will have no time to prepare to save themselves against that kind of technology. They don't believe and they won't take time to prepare.

(This is exactly what happens to people who are convinced by Satan into believing that he doesn't exist, so they have no defence against him. – JAH.)

Universal Supernatural Manifestations via Electronics – The fourth step concerns the universal supernatural manifestation with electronic means. It contains three different orientations.

One is to make mankind believe that an alien (off-world) invasion is about to occur at every major city on earth in order to provoke each major nation to use its nuclear weapons in order to strike back. This way, the United Nations Court will require that all those nations which launched nuclear weapons to disarm when the invasion is shown to have been false. And how will the United Nations know that the invasion was false? They will have staged it, of course.

The second is to make the Christians believe that the Rapture is going to occur with the supposed divine intervention of an alien (off-world) civilization coming to rescue earthlings from a savage and merciless demon. Its goal will be to dispose of all significant opposition to the implementation of the New World Order in one major stroke, actually within hours of the beginning of the sky show!

The third orientation in the fourth step is a mixture of electronic and supernatural forces. The waves used at that time will allow "supernatural forces" to travel through optical fibers, coaxial cables (TV) electrical and phone lines in order to penetrate to everyone at once through major appliances. Embedded chips will already be in place. The goal of this deals with global Satanic ghosts projected all around the world in order to push all populations to the edge of hysteria and madness, to drown them into a wave of suicide, murder and permanent psychological disorders. After the Night of the Thousand Stars, worldwide populations will be ready for the new messiah to re-establish order and peace at any cost, even at the cost of abdication of freedom.

Phasing Out Cash & Independence The techniques used in the fourth step is exactly the same used in the past in the USSR to force the people to accept Communism. The same technique will be used by the United Nations to implement the new world religion and the new world order. A lot of people ask when

this is going to happen and how they will accomplish the visions of the Night of a Thousand Stars, and the events that will point to the days when it will begin.

According to the many reports we have received, we believe it will begin with some kind of worldwide economic disaster. Not a complete crash, but enough to allow them to introduce some kind of in-between currency before they introduce their electronic cash to replace all paper or plastic money. The in-between currency will be used to force anyone with savings to spend or turn in their cash because they understand that people who have money and are not dependent upon them might be the very ones who will mount an insurrection against them. If everyone is broke, no one can fund a war of any kind: paper currency will cease to exist. This is one of the first signs.

But to implement the worldwide electronic money system, everyone in the world who might have money in the future, will have to have a way to transfer money electronically. Before that time, everyone will have spent, before the year 2,000, all of their cash, reserves and assets. Everyone has to be 100% dependent upon the Council for their existence. To prevent any kind of independence, the new world order has already implanted micro chips in wild animals, birds, fish, etc. Why? They want to make certain that the people who will not accept the New World Order will not be able to hunt or fish anywhere in the world. If they try, they will be tracked and traced by satellites, then hunted down and imprisoned or killed.

The new world order is already changing the laws of all nations to make everyone dependent upon a single food and vitamin supply. They are changing laws about religion and psychiatric disorders in order to identify anyone who is potentially threatening to the NWO. Those who are found defective will be sent to eradication camps where their organs will be taken and sold to the highest bidders. Those who are not killed outright will be used as slave labor or used in medical experiments. The goal of a dictatorship is to control everyone, everywhere on the planet, ruthlessly and without exception. That's why the new technology being introduced everywhere is a technology for the control of the people. The technology of the 1940s and 1950s was used to help the people have an easier and more productive life.

The new technology is designed and built to track down and control people everywhere. This technology is being manufactured for a specific purpose and to refuse to see and recognize that purpose, which is to enslave the entire populations of the world, is to deny the emergence of the Antichrist and the establishment of the new world order religion and government. If you cannot see, if you cannot learn, if you cannot understand, then you and your family and friends will succumb to the fires of the crematoria that have been built in every state and every major city on earth, built to deal with you. No one is safe in a totalitarian police state!
